The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ruckdeschel (U.S. 6,545,352) in view of Kelly (U.S. 6,131,646).

Ruckdeschel discloses a method and apparatus for removing heat in mobile electronic devices comprising:

 providing that the heat-emitting electrical components be brought into heat-dissipating contact with a heat conducting member (60), and providing that the conducting member be brought into contact with a heat sink.

Ruckdeschel's invention discloses all of the claimed limitations from above except for the metal foil being structured in at least one of corrugated form and honeycomb form, wherein the heat-emitting electrical components are each in heat-dissipating contact with the metal foil.

3. However, Kelly teaches the use of a metal foil being structured in at least one of corrugated form and honeycomb form, wherein the heat-emitting electrical components are each in heat-dissipating contact with the metal foil.

Given the teachings of Kelly, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the mobile electronic device of Ruckdeschel with a metal foil being structured in at least one of corrugated form and honeycomb form, wherein the heat-emitting electrical components are each in heat-dissipating contact with the metal foil.

Doing so would provide a very efficient means of dissipating heat from heat generating electronic devices.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references cited on the USPTO 892 discloses related limitations of the applicant's claimed and disclosed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Terrell L. Mckinnon whose telephone number is 571-272-4797. The examiner can normally be reached on Monday -Thursday and every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry Bennett can be reached on 571-272-4791. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
